Greening the Capitol Mall

First there was Capitol Mall Recycling ... and thanks to everyone's overwhelming participation, the Capitol Mall continues to successfully divert over 20 tons per year of recyclables from our local landfill.

Now there is the new Capitol Mall Green Cleaning Initiative.

Effective June 1 Facilities Services will be implementing a Capitol Mall Green-Clean program.

In partnering with ABM Janitorial Services, we have implemented new plant-based bio-cleansers, micro-fiber cloths and mops, and HEPA filtration vacuum systems in all Capitol Mall buildings.

In addition to reducing our carbon footprint and conserving water, the green cleaning processes, equipment and chemicals have been proven to greatly reduce the impact of VOC's (volatile organic compounds) to our building occupants, janitors, and the general public who visit our buildings daily.

We are very excited to bring this new program online, and we hope that you'll see first-hand what a difference the Capitol Mall Green-Clean program makes.

Thank You,

Facilities Services
